ABOUT BACKSAVER

WORK HARD LIFT SMART

Backsaver has been a specialist in the manufacture of top-quality stainless-steel lifting and tipping machinery for the food industry since 1990. Backsaver machines are simple and easy-to-use solutions for process optimization resulting in healthy employees.

Backsaver is an offshoot of the van Oirschot Roestvrijstaal BV, a family business established in 1948 as a specialist in stainless-steel custom work. For more than 40 years, we have accrued great experience in the manufacture of lifting and tipping machinery. In the early 1990s, having seen the huge demand for this kind of machinery, we established a separate brand called "Bacsaver." The brand name "Bacsaver" is entirely appropriate. After all, our machines may provide user-friendly solutions for process optimization, but they also prevent the risk of injury due to repeated bending and heavy lifting.

OUR MISSION IS TO BUILD HIGH-QUALITY STAINLESS-STEEL LIFTING AND TIPPING MACHINERY FOR THE FOOD INDUSTRY, MAKING IT EASY TO ENHANCE YOUR PRODUCTION AND MINIMIZE WORKPLACE INJURIES.

Bacsavers stainless-steel lifting and tipping machines are designed and manufactured with more than 40 years of experience in the Netherlands at our in-house design engineering and production facility. Thanks to comprehensive customization, we can meet the requirements of any production facility. Each Operating as a team, with a short line and optimal efficiency, we focus on customer service and total satisfaction, so we'll always think from your perspective. Our job is to provide quality solutions that ensure immediate satisfaction.
