

# Model PS21

Automatic Patty Forming Machine

UL EPH Classified NSF/ANSI 8 Commercial Powered Food Preparation Equipment

**Height:** 36"

**Motor:** 1/2 HP

**Depth:** 34"

**Volts:** 115

**Width:** 34"

**Amps:** 13

**Weight:** 225 lbs

**Cycle:** 60

**Production:** 2100 per hour standard

**Mold Plate:** Up to 3/4" thick in any shape

## FACTS AND FEATURES OF THE MODEL PS21:

- Stainless steel cabinetry
- Volume and pressure controlled simply with the location of a single ring pin
- Interleaves paper between patties
- Stacks patties perfectly
- Reload paper without stopping the machine
- Riser Platform for increased stacking and easy cleaning
- Convenience package for ease of operation
- No special tools required for disassembly
- Quick Disassembly for cleaning
- Built in circuit breaker
- Drive mechanism engineered for increased durability
- 1 Shot Lubrication System
- 1 year parts warranty

### QUICK MOLD PLATE CHANGES

The convenient attachment of the connecting arm allows for quick and easy mold plate and spacer plate changes

### HEAVY DUTY CONSTRUCTION

The Model PS21 has a durable feeder, a solid steel plate frame construction, and two heavy duty rated roller chains

## MOLD PLATE SHAPES

- Virtually any shape can be molded: square, round, oval, chop, homestyle, even meatballs
- Varied thicknesses up to 1-1/2"
- Capable of molding from a fraction of an ounce to 8 ounces

## FEED CONTAINERS FOR THE MODEL PS21

**LOW PROFILE STAINLESS STEEL FEED TRAY**

- 60 lb capacity
- Heavy gauge stainless steel
- 1 piece body for quick clean up

**STAINLESS FEED PAN**

- 40 lb capacity
- Stainless steel and aluminum construction
- Easy access from all sides

**PLASTIC COVERED FEED TRAY**

- 75 lb capacity
- Hi-density polyethylene, F.D.A. approved
- Covered for easy operation
- Heavy wall construction stainless steel reinforced

**STAINLESS STEEL COVERED FEED TRAY**

- 125 lb capacity
- Heavy gauge stainless steel
- 1 piece body construction
- Covered for easy operation
